PERSONAL PROJECTS

Fishing Buddies (12/2023 - Present)

- <https://fishing-buddies.fly.dev/>
- This is a "social network for fishermen" full-stack application, developed with React and ASP.NET Core . It features authorization and authentication of users (and Facebook sign-in), email validation, Refresh Token functionality, client and server-side data validation, persisting data, all CRUD operations, error handling, WebSocket protocol, photo-uploading to a third party service (Cloudinary), user followings, event attendance, various filtering mechanisms, responsive design, dark and light themes, and more...

Trivia-I (07/2023 - 08/2023)

- <https://trivia-l.web.app/>
- Trivia-I is a SPA (single page application) with responsive design, developed with the help of tools and technologies, such as ReactJS, Redux-Toolkit, Typescript and Tailwind CSS, among others.

CHOREMINDER (06/2023 - 07/2023)

- https://chore-minder.web.app
- CHOREMINDER is a single page application (SPA) with responsive design, developed with React, using technologies such as Typescript and SASS. It supports authentication and authorization, meaning that every single user can see only his own chores.

Crazy Calculator (04/2023 - 05/2023)

- <https://crazy-calculating-challenge.web.app/>
- Crazy Calculator is a SPA. It consists of two interconnected functionalities - calculator and a game.

NFTs Gallery (02/2023 - 05/2023)

- https://nfts-gallery.web.app
- The application is designed as a SPA. It has authentication, authorization, client-side routing (via React Router Dom) and route-guards. It also has responsive design, error-handling and data validation implemented.
